FILTERS

Creator Studio · what it supports today, and what can be added

Today the looks are baked into each style rather than offered as a one-tap filter menu. The filters below are the ones the renderers apply. Each preview uses the same painting so you can compare.

Built in

Original
no filter

Film grain + vignette
on every papercut frame; the grain changes each frame

Defocus blur
flip-book backgrounds, foreground tree

Haze
misty horizon in the night scene

Fade to dark
ending dim of the flip-book

Night scene grade
cool blue night with warm lamps (flip-book)

FILTERS

Creator Studio · what it supports today, and what can be added

NOT BUILT YET (CAN BE ADDED ON REQUEST)

These previews were made just now with a few lines of image code, to show what each filter would look like. They are not options in the renderers yet. Once added, they could apply to whole reels, single scenes or still images.

Black and white

Sepia

Warm

Cool

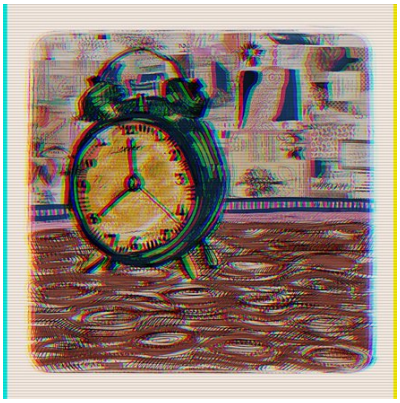

High contrast

Faded matte

Duotone
cobalt + mustard

VHS
colour split + scanlines

Poster / riso
reduced colours

Custom colour grades (LUT files from other editors) could also be applied to finished videos with the video encoder already used here (ffmpeg).
